## 2. HAZARD IDENTIFICATION

| Z. HAZARDII               | DENTIFICATION  |
|---------------------------|--|
| Classification            | - Classification under South African<br>Hazardous Chemical Substances<br>Regulations subsequently amended.<br>(HCS)  |
|                           | -Classification under the Globally<br>Harmonized System of classification and<br>labelling of chemicals (GHS)  |
| Emergency<br>Overview     | Colour: None<br>Odour: None<br>Taste: None<br>Physical State: Compressed Gas<br>Form: Gas under pressure   |
|                           | <ul> <li>All cylinders are portable gas containers<br/>and must be regarded as pressure vessels<br/>at all times.</li> <li>P 10 Quench gas does not support life.</li> </ul> |
| Adverse Health<br>Effects | - Asphyxiant   |
| Chemical<br>Hazards       | - Asphyxiant   |
| Biological<br>Hazards     | - The greatest physiological effect of P 10<br>Quench gas is to cause asphyxiation.  |
| Vapour<br>Inhalation      | - Asphyxiation   |
| GHS<br>Classification     | - Gas under pressure   |
| GHS Pictogram             | $\diamond$   |
| GHS Signal<br>Words       | Warning  |
| GHS Hazard<br>Statements  | - H280: Contains gas under pressure, may explode if heated   |

| GHS<br>Precautionary<br>Statements                          | Storage:<br>- P403 : Store in a well-ventilated place.<br>Prevention:<br>- P280 : Wear protective gloves/eye<br>protection/face protection.<br>Response:<br>- None<br>Disposal<br>- None |
|---|--|
| Other Hazards<br>that do not<br>result in<br>classification | - Asphyxiant in high concentrations  |

## 3. COMPOSITION OF INGREDIENTS

| Chemical name<br>Chemical family | Methane        |
|----------------------------------|----------------|
| CAS No                           | 74-82-8        |
| UN No                            | 1971           |
| ERG No                           | 115            |
| Hazard class                     | Class 2.1      |
| Hazchem Warning                  | Compressed gas |
|                                  |                |
| Chemical name                    | Argon          |
| Chemical family                  |                |
| CAS No                           | 7440-37-1      |
| UN No                            | 1006           |
| ERG No                           | 121            |
| Hazard class                     | Class 2.1      |
| Hazchem Warning                  | Compressed gas |

# 4. FIRST AID MEASURES

| 4. FIRST AII | D MEASURES  |
|--------------|---|
| Eye contact  | <ul> <li>The liquid may cause frostbite</li> <li>Rinse the eye with water immediately.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>Flush thoroughly with water for at least 15 minutes.</li> <li>Get immediate medical assistance. If medical assistance is not immediately available, flush an additional 15 minutes.</li> </ul>   |
| Skin Contact | <ul> <li>The liquid may cause frostbite.</li> <li>For exposure to liquid, immediately warm frostbite area with warm water not to exceed 41°C. Water temperature should be tolerable to normal skin.</li> <li>Maintain skin warming for at least 15 minutes or until normal colouring and sensation have returned to the affected area.</li> <li>In case of massive exposure, remove clothing while showering with warm water. Seek medical evaluation and treatment as soon as possible.</li> </ul> |
| Ingestion    | - Ingestion is not considered a potential route of exposure.  |
| Inhalation   | <ul> <li>In high concentrations may cause<br/>asphyxiation. Symptoms may include loss of<br/>mobility/consciousness. Victim may not be<br/>aware of asphyxiation.</li> </ul>  |

P 10 Quench gas

## Please ensure that this SDS is received by the appropriate persons

### Review Date: 30/8/2022 v01

Emergency: 0860 02 02 02

Document Number: AFX-SDS-0056

| <ul> <li>Remove victim to uncontaminated area<br/>wearing self-contained breathing apparatus.</li> <li>Keep victim warm and rested. Seek medical<br/>attention. Apply artificial respiration if<br/>breathing stopped.</li> </ul> |
|---|
| -Low concentrations of P 10 Quench gas will<br>not cause irritation   |

| 5. FIRE-FIGH   | HTING MEASURES   |
|--|--|
| Suitable<br>extinguishing<br>media                         | <ul> <li>Material will not burn. In case of fire in the<br/>surroundings: use appropriate extinguishing<br/>agent.</li> </ul>  |
| Unsuitable<br>extinguishing<br>media:                      | - None.  |
| Specific<br>Hazards  | - Asphyxiant   |
| Special fire<br>fighting<br>procedures:                    | <ul> <li>In case of fire: Stop leak if safe to do so.</li> <li>Continue water spray from protected<br/>position until container stays cool. Use<br/>extinguishants to contain the fire.</li> </ul>                       |
| Special<br>protective<br>equipment<br>for<br>firefighters: | - Exposed Firefighters must use standard<br>protective equipment including flame<br>retardant coat, helmet with face shield,<br>gloves, rubber boots, and in enclosed<br>spaces a self-contained breathing<br>apparatus. |

### 6. ACCIDENTAL RELEASE MEASURES

| Personal<br>precautions,<br>protective<br>equipment<br>and<br>emergency<br>procedures: | <ul> <li>WARNING! Liquid and gas under pressure.<br/>Rapid release of gaseous P 10 Quench gas<br/>through a pressure relief device (PRD) or<br/>valve can result is very cold and can cause<br/>frostbite.</li> <li>Evacuate area.</li> <li>Provide adequate ventilation.</li> <li>Wear self-contained breathing apparatus<br/>when entering area unless atmosphere is<br/>proved to be safe.</li> </ul> |
|--|--|
|  | <ul> <li>In an enclosed or non-ventilated space, a<br/>self-contained breathing apparatus must be<br/>used</li> </ul>  |
| Environmental<br>Precautions   | <ul> <li>Prevent further leakage or spillage if safe to<br/>do so</li> </ul>   |
| Methods and<br>material for<br>containment<br>and cleaning<br>up:                      | - Provide adequate ventilation.  |

## 7. HANDLING AND STORAGE

| Safe Handling | -Only experienced and properly instructed     |
|---------------|---|
|               | persons should handle gases under             |
|               | pressure. Use only properly specified         |
|               | equipment which is suitable for this product, |
|               | its supply pressure and temperature. Refer to |
|               | supplier's handling instructions. The         |
|               | substance must be handled in accordance       |
|               | with good industrial hygiene and safety       |

|  | procedures. Protect containers from physical<br>damage; do not drag, roll, slide or drop. Do<br>not remove or deface labels provided by the<br>supplier for the identification of the container<br>contents. When moving containers, even for<br>short distances, use appropriate equipment<br>eg. trolley, hand truck, fork truck etc. Secure<br>cylinders in an upright position at all times,<br>close all valves when not in use. Provide<br>adequate ventilation. Suck back of water into<br>the container must be prevented. Do not<br>allow backfeed into the container. Observe all<br>regulations and local requirements regarding<br>storage of containers. When using do not eat,<br>drink or smoke. Store in accordance with<br>local/regional/national/international<br>regulations. Never use direct flame or<br>electrical heating devices to raise the<br>pressure of a container. Leave valve<br>protection caps in place until the container<br>has been secured against either a wall or<br>bench or placed in a container stand and is<br>ready for use. Damaged valves should be<br>reported immediately to the supplier Close<br>container valve after each use and when<br>empty, even if still connected to equipment.<br>Never attempt to repair or modify container<br>valves or safety relief devices. Replace valve<br>outlet caps or plugs and container caps were<br>supplied as soon as container is<br>disconnected from equipment. Keep<br>container valve outlets clean and free from<br>contaminants particularly oil and water. If<br>user experiences any difficulty operating<br>container valve discontinue use and contact<br>supplier. Never attempt to transfer gases<br>from one container to another. Container<br>valve guards or caps should be in place. |
|--|---|
| Conditions<br>for safe<br>storage,<br>including any<br>incompatibilit<br>ies | -Containers should not be stored in conditions<br>likely to encourage corrosion. Keep away<br>from food, drink and animal feeding stuffs.<br>Stored containers should be periodically<br>checked for general conditions and leakage.<br>Container valve guards or caps should be in<br>place. Store containers in location free from<br>fire risk and away from sources of heat and<br>ignition. Keep pressure containers away from<br>combustible material.  |
| 8. EXPOSUR   | RE CONTROLS AND PERSONAL  |

# 8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

| Occupational<br>Exposure<br>Hazards<br>(HCS) | -Not specified  |
|--|---|
| Engineering<br>Control<br>Measures           | <ul> <li>Engineering control measures are preferred<br/>to reduce exposures.</li> <li>General methods include mechanical<br/>ventilation, process or personal enclosure,<br/>and control of process conditions.</li> <li>Administrative controls and personal<br/>protective equipment may also be required.</li> </ul> |

P 10 Quench gas

# Please ensure that this SDS is received by the appropriate persons

### Review Date: 30/8/2022 v01

Emergency: 0860 02 02 02

Document Number: AFX-SDS-0056

|                        | A Risk assessment should be conducted to evaluate the suitability of PPE to the task being performed  |
|------------------------|---|
| Personal<br>Protection | - When allowed by a risk assessment<br>Respiratory Protective Equipment (RPE)<br>may be used. The selection of the<br>Respiratory Protective Device (RPD) must<br>be based on known or anticipated exposure<br>levels, the hazards of the product and the<br>safe working limits of the selected RPD.<br>Self-contained breathing apparatus (SCBA)<br>or positive pressure airline with mask are to<br>be used in oxygen-deficient atmospheres. |
| Eyes                   | - Wear safety glasses   |
| Hands                  | <ul> <li>Guideline: Protective gloves against<br/>mechanical risks.</li> <li>Additional Information: Wear working gloves<br/>while handling containers</li> </ul>   |
| Body<br>protection:    | -Wear leather apron when handling liquid containers   |
| Feet                   | - Wear safety shoes while handling containers   |

| 9. PHYSICAL AND CHEMICAL                     | . PROPERTIES          |
|--|-----------------------|
| Chemical Name                                | 10% Methane Bal       |
|  | Argon                 |
| Chemical Symbol                              | CH4 Ar                |
| Physical state                               | Gas                   |
| Form:  | Gas                   |
| Colour:                                      | Colourless            |
| Odour:                                       | Odourless             |
| Odour Threshold:                             | No odour              |
| pH:  | No effect in water    |
| Melting Point:                               | -187.6°C              |
| Boiling Point:                               | –185.87 °C            |
| Sublimation Point:                           | -Not Applicable       |
| Critical Temp. (°C):                         | -122.29 °C            |
| Flash Point:                                 | Not applicable        |
| Evaporation Rate:                            | Not applicable        |
| Flammability ( gas):                         | Non-Flammable         |
| Flammability limit - upper (%):              | Not applicable        |
| Flammability limit - lower(%):               | Not applicable        |
| Vapour pressure:                             | Permanent gas         |
| Vapour density (air=1)                       | 1.56 @ 20°C           |
| Relative density:                            | 1.30 @ 20 °C          |
| Solubility(ies)                              |                       |
| Solubility in Water:                         | 0.032 l/kg water 20°C |
| Partition coefficient (n-<br>octanol/water): | Not known             |
| Autoignition Temperature:                    | Not applicable        |
| Decomposition Temperature:                   | Not known             |
| Viscosity                                    |                       |
| Kinematic viscosity:                         | No data available     |
| Dynamic viscosity:                           | Not applicable        |
| Explosive properties:                        | Not applicable        |
| Oxidising Properties:                        | Not applicable        |
| Molecular weight                             | 37.55 g/mol           |

| 10. STABILITY AND REACTIVITY              |  |
|---|--|
| Reactivity                                | -Not reactive  |
| Chemical<br>stability                     | - Stable under normal conditions.  |
| Possibility of<br>hazardous<br>reactions  | - Gas under high pressure. Accumulate in<br>low lying areas.   |
| Conditions to avoid                       | <ul> <li>Overheating of cylinders. Never use<br/>cylinders as rollers or supports; or for any<br/>other purpose than the storage of P 10<br/>Quench gas</li> </ul> |
| Incompatible<br>Materials                 | None   |
| Hazardous<br>Decomposition<br>of Products | Will not decompose   |

| 11. | TOXOLOGICAL | INFORMATION |
|-----|-------------|-------------|
|     |             |             |

| Acute Toxicity       | Non toxic   |
|----------------------|---|
| Skin & eye contact   | No adverse effect   |
| Chronic Toxicity     | Based on available data, the classification criteria are not met. |
| Carcinogenicity      | Based on available data, the classification criteria are not met. |
| Mutagenicity         | Based on available data, the classification criteria are not met. |
| Reproductive Hazards | Based on available data, the classification criteria are not met. |

| 12. ECOLOGICAL INFORMATION                 |  |
|--|--|
| Toxicity                                   | No ecological damage caused by this<br>product.                |
| Persistence and<br>degradability           | Not applicable   |
| Bioaccumulative<br>Potential<br>Product    | No bio-accumulating hazard.                                    |
| Mobility in soil                           | No hazard  |
| Results of PBT<br>and vPvB<br>assessment   | Not classified as persistent, bioaccumulating and toxic (PBT). |
| Other adverse<br>effects                   | No ecological damage caused by this<br>product                 |
| Effect on ozone<br>layer                   | None   |
| Effect on the<br>global warming<br>(CO2=1) | 0  |

| 13. DISPOSAL CONSIDERATIONS |  |
|-----------------------------|--|
| Disposal                    | Do not discharge into any place where its  |
| Methods                     | accumulation could be dangerous. Vent to atmosphere in a well-ventilated place.  |
| Disposal of<br>Packaging    | The container is the property of the supplier<br>and the disposal of the containers must<br>only be handled by the supplier. |

| 14. TRANSPORT INFORMATION |                 |
|---------------------------|-----------------|
| Road Transportation       |                 |
