## Afrox Filmax Ni-I Afrox TIG Ni-I

Afrox Ni-I solid wires for TIG and MIG welding are designed to give a low carbon pure nickel deposit with the addition of titanium for refinement and de-oxidation. They are used for joining pure nickel to itself, for buffer layers, and for cladding joint faces and flanges. The solid wire is also useful for welding cast iron to give a soft low strength deposit. Afrox Filmax Ni-I is also excellent for metal spraying.

### Applications

Applications include tanks and vessels, process pipework and heat exchangers, in chemical plant for salt production, chlorination and evaporation of caustic soda. Also used for handling corrosive alkalis and halides. Repair and rebuilding of standard grades of grey cast irons and malleable cast irons.
