6. DELIVERY CHARGES (refer to Annexure A & B for Delivery Charge Escalation Methodology, Collection Compliance Manual)	
Distance from Source (kilometres)	Delivery Charge – LSL
1 -30	L2,041.00
31 – 60	L2,487.00
61 – 90	L2,936.00
>=91	L3,608.00

The delivery charge is based on a 4-Tiered radius/distance in kilometres from an Afrox supply site to a customer’s designated delivery point.

Delivery charges will apply to Industrial Packaged Gases, Medical Packaged Gases, Special Gases, Refrigerants, Non-Regulated LPG Packaged, Hospitality and Hardgoods (Welding Equipment and Consumables). Delivery charges are subject to change.

No customer purchase orders will be processed from the effective date if no delivery charge is specified on your order. Afrox urges you to align your purchase order process by catering for the delivery charge to minimize any disruption in supply.

Refer to Annexure A & B (Delivery charge and escalation methodology and Collection Compliance Manual)

ANNEXURE A

DELIVERY CHARGE AND ESCALATION METHODOLOGY

Afrox will, from 1st July 2022, implement the delivery charges to its Packaged Gases and Products (“PGP”), Special Gases and Refrigerants, Non-Regulated Packaged, LPG, Hospitality and Hardgoods (Welding Equipment and Consumables) customer bases.

The delivery charge takes into consideration a number of elements and factors, including:

1. Fuel/diesel: Diesel 0.05% Sulphur,
2. Labour, and
3. Other transport components and requirements.

The Fuel Component: Diesel 0.05% Sulphur will be adjusted as a portion of the cost directly related to the published price (DMRE) by the first Wednesday of each month. Accordingly, the price may vary as the Fuel Component fluctuates.

For the Labour component, the price will be adjusted by Afrox effective March every year.

For other transport components, the price will be reviewed by Afrox quarterly.

Prices will be reviewed in accordance with the components, and weightings may vary from time to time based on input cost changes and other factors.

ANNEXURE B

COLLECTION COMPLIANCE MANUAL

The following conditions will apply to those customers eligible for collection. The respective customer will need to comply strictly with the prescribed conditions.

Branches at Afrox that offer collections and their Site-specific conditions.

Site Name	Gases Collection restrictions	Welding Collection restrictions
Maseru, Lesotho	4T GVM Rigid vehicle	4T GVM Rigid vehicle

Please note each site has limitations on stock holdings based on the local Major Hazard Review Process (MHRP) and Fire Department Guidelines. Customers are therefore urged to enquire with collection sites on stock availability prior to collection.

Quantity of Products that may be collected from Branches: with quantities exempt from Dangerous Goods requirements by law.

DANGEROUS GOODS TRANSPORTATION EXEMPTION				
GENERIC PRODUCT	PRODUCT WEIGHT (kg)	MAX kg/Ltr	WEIGHT FACTOR	MAX CYLINDER QTY
Dissolved Acetylene	8	100	10	12
Argon	18	500	2	20
Compressed Air	9	500	2	20
Nitrogen	11	500	2	20
Oxygen	12	200	5	16
CO2	32	500	2	15
N2O	32	200	5	6
Helium	2	500	2	20
Hydrogen	1	100	10	20
LPG 9KG	9	100	10	11
LPG 14KG	14	100	10	7
LPG 19KG	19	100	10	5
LPG 48KG	48	100	10	2
Mix Load Exemption Calculation		kg/Ltr Quantity x Factor		
Note: Total Mixed Load Sum below 1000kg exempted.				

NB: A customer may not exceed the loading capacity of the vehicle's plated Gross vehicle Mass (GVM).

Driver compliance for non-Dangerous Goods based on the above table.

- A valid driver's license applies to the vehicle being operated.
- A driver is responsible for ensuring the load is secured.
- Driver to obey site rules.

Vehicle compliance for non-Dangerous goods collections

- Legally Road Worthy per the National Road traffic act of 1996
- Valid license applicable to the vehicle
- No trailers are to be used for the conveyance of cylinders.

Products that cannot be collected and can only be delivered.

- Manifold Cylinder Pallet (MCP)
- Portable Cryogenic Containers (PCC)
- Ammonia Barrels
- Refrigerant Drums
- Ammonia cylinders
- Sulphur Dioxide (SO2)
- Toxic chemicals that require special knowledge and handling (refer to Afrox Product Reference manual)

Non-compatible products that should be compartmentalized when transported.

- Oxygen and flammable gases (for example, LPG / acetylene)
